

WELCOME

Dr. Karam would like to thank you for choosing his practice for your dental care. The doctor and staff here will do our very best to provide you with the necessary treatment with your comfort, health and convenience in mind. We pride ourselves on providing complete treatment plans with gentle care and excellent results.

Today, a thorough dental examination was performed on your teeth. The results of the examination will supply a firm foundation for which Dr. Karam can recommend a program for proper dental care. This program will include preventative care that you will be able to include in your daily routine as well as timely professional care. Maintaining the good health of your teeth throughout your lifetime is not only desirable, but is possible. We will show you how.

We understand that everyone's time is valuable. For your convenience, evening and Saturday appointments are available. We encourage you to schedule your professional cleaning appointments 3-6 months in advance. We appreciate you joining the practice and are glad to be able to provide you with excellent dental care. We know you will be happy with the service and care you are receiving, and would love for you to recommend our office to your family and friends.

Welcome, Dr. Karam and Staff.
